EDUCATIONAL BACKGROUND

Bulacan State University

Hagonoy, Bulacan 2022-2026

Bachelor of Industrial Technology

Major in Computer Technology

Relevant Coursework: Computer Hardware Servicing, Computer Networking, Operating Systems, Database Management, Web Development, Programming Fundamentals, System Analysis and Design, Embedded Systems & IoT, Computer Systems Maintenance, Technical Support. Capstone / hands-on projects: Smart Hydroponic Vertical Farming system (solar-powered automated system) — award-winning thesis; practical labs in hardware servicing, network setup, and technical support scenarios.

TECHNICAL SUPPORT EXPERIENCE

Municipality of Hagonoy – Sto. Niño Poblacion, Hagonoy

On-the-Job Trainee (OJT) | Dec 2025 – Mar 2026

- Provided first-line technical support to municipal employees, troubleshooting desktops, printers, mobile devices, routers, and IoT equipment. Performed operating system recovery, workstation setup, data migration, network installation, and hardware diagnostics while ensuring timely resolution of user issues.
- Installed, configured, and formatted Windows operating systems for deployment and maintenance.
- Assisted with network installation, UTP cabling, and basic network configuration.
- Performed printer maintenance and provided technical support to staff for hardware and software concerns.

PROJECTS

Smart Hydroponics Farm Website

www.smarthydrofarm.com | <https://www.smarthydrofarm.com>

- Developed a web-based smart hydroponics monitoring and management system using HTML, CSS, JavaScript, PHP, MySQL, and REST APIs for real-time ESP32 IoT communication.
- Implemented real-time monitoring, remote control, and automated data collection features, contributing to an award-winning Smart Hydroponic Vertical Farming system.

Ivan Movies – Web-Based Movie Streaming Interface

ivnx9.github.io/movies/index.html | <https://ivnx9.github.io/movies/index.html>

- Developed an experimental web-based movie browsing and streaming interface using HTML, CSS, JavaScript, PHP, MySQL, and REST API integration as a hands-on project to explore AI-assisted ("vibe coding") development, featuring categorized movie listings, a Smart TV-style interface, and a full-screen video player.
- Implemented keyboard and remote-style navigation, QR code pairing, and Socket.IO-based smartphone remote control through a Render-hosted server, while integrating an external embedded video source for demonstration purposes to strengthen skills in API integration, responsive UI design, and real-time client-server communication.

TECHNICAL SKILLS

Programming Languages: JavaScript · PHP · Java · C++

Web Development: HTML · CSS · REST API · JSON

Database: MySQL · phpMyAdmin

Tools & Software: GitHub · Figma · Canva · VS Code · Selenium

Embedded Systems / IoT: Arduino · ESP32

Backend Development: PHP · API Development · HTTP Requests · JSON Data Processing

Networking: Network Installation and Configuration · UTP Cabling · TCP/IP Fundamentals

System Administration: Windows OS · Windows Server · Basic Active Directory · Microsoft 365

IT Support: Computer Troubleshooting · Printer Troubleshooting · Hardware Installation and Maintenance · Technical Support

ABOUT

Recent Computer Technology graduate with a strong foundation in software development, database management, networking, and problem-solving. Hands-on experience developing academic and personal technology projects has strengthened my analytical thinking, technical troubleshooting, and ability to quickly adapt to new tools and technologies. Passionate about building practical technology solutions and committed to continuous learning and professional growth. A motivated, detail-oriented, and collaborative individual eager to contribute to organizational success while expanding my technical expertise in a dynamic and challenging environment.

CERTIFICATIONS

Certificate of Completion: Install and Configure computer systems TESDA	May 2025
Certificate of Completion: Set-up Computer Networks TESDA	May 2025
Certificate of Completion: Set-up Computer Servers TESDA	May 2025
Certificate of Completion: Maintain and Repair Computer Systems and Networks TESDA	May 2025
Certificate of Completion: Introduction to Internet of Things CISCO	September 2024

ACHIEVEMENTS & CERTIFICATIONS

Best in Thesis Award – A Solar-Powered Automated System with remote management for Smart Hydroponic Vertical Farming, Bulacan State University **June 2026**

ORGANIZATIONS & CAMPUS INVOLVEMENT

Future Industry Professionals Organization (FIPO)	2023 – 2024
Assistant Digital Artist (Acting Lead Designer)	
- Created promotional materials and digital content for organizational events and student activities. - Coordinated with event organizers and cross-functional teams to deliver promotional materials on time; communicated with stakeholders to refine requirements and ensure deliverable accuracy
